IntelliSpace ECG

ECG management system

Philips IntelliSpace ECG provides fast, easy access to ECGs from almost anywhere, anytime to enhance your workflow through extensive connectivity.

Features

Custom set-up meets your individual needs

IntelliSpace ECG enhances the flexibility of workflow management. Automatically manage the flow of ECG records via rules you establish for acquisition, review, editing, final storage, and report distribution.

Central access point simplifies ECG workflow

You can access ECG reports at the point of decision and view ECGs from multiple vendors and modalities. Using the IECG Anywhere web-based client, you can even access ECG information on a desktop, laptop or mobile device. Current and previous ECGs can be displayed in serial presentation mode for easy comparison. You can customize your personal viewing and editing preferences. Configurable calipers facilitate editing for both HTML5, browser-based or the .NET, web-based access.

Flexible design to reduce costs

Take advantage of state-of-the-art three-tier software architecture and blade technology for scalability, high availability, mirroring, and load balancing that can also expand and adapt to meet your evolving needs. For example, partitioning your database can improve the performance of day-to-day operations on recently acquired ECGs, while reducing the maintenance effort for the large number of archived ECGs.

Scalable system to grow with you

Easily manage from thousands to over one million ECGs per year. ECGs are captured, stored, and reconciled to enhance revenue recognition via networked orders. Grow the system as your enterprise grows. Collect ECGs, stress, and Holter studies from multi-vendor devices across multiple modalities.

Automated workflow increases efficiency

Use rules-based workflow to automate tasks and better utilize resources. Assign security roles by user and responsibility. Increase department efficiency and assist Joint Commission initiatives with standard or custom management reports.

Industry-standard platforms to safeguard performance

Rely on industry-standard platforms for servers and clients for dependable performance. Use HL7 messaging and IHE/HL7 compliant web services for enterprise connectivity. Virtual machine or software-only options are available to help you leverage available enterprise servers.

Specifications

Editions

Clinic edition	Storage licensed for up to 10,000 ECGs
Basic edition	Storage licensed for up to 50,000 ECGs
Standard edition	Storage licensed for up to 500,000 ECGs
Enterprise edition	Storage licensed for up to 2,000,000 ECGs
Universal edition	Storage licensed for up to 10,000,000 ECGs

Standards

Servers, blades, multi-servers or virtual servers	Microsoft® Windows Server® 2012 / Microsoft Windows Server 2008 R2 • Microsoft SQL Server® 2014 / Microsoft SQL Server 2008 R2
.NET Windows Client	Microsoft Windows® 7/Windows 8 • .NET 4.0
IECG Anywhere client (zero foot-print environment)	Compatible browsers: • Internet Explorer® 10 and newer • Chrome™ 25 and newer • Firefox® 19 and newer • Safari® 4 and newer
Formats	XML-based ECG acquisition, storage, and export
